

SACKIT CHAIR OUTDOOR

instruction manual

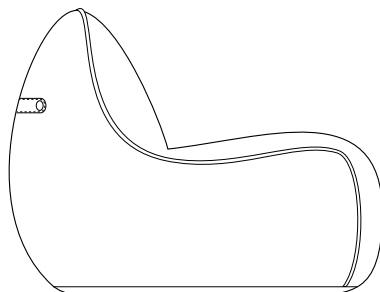

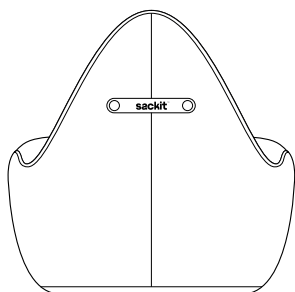

ASSEMBLY VIDEO

INTRODUCTION

SACKit Chair Outdoor blends comfort, aesthetics, design, and function in one harmonious expression. It is designed to create space for calm and balance – those moments when everyday life slows down.

A lounge chair for life at home - timeless, tactile, and unmistakably Scandinavian in both form and feel.

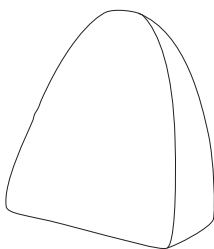

- Comfort that lasts – Filled with soft, supportive foam that adapts to your body and keeps its shape and comfort year after year
- Made for everyday living – Designed to blend naturally into any space and every moment – outdoor as well as indoor.
- Crafted with care – Thoughtfully designed and built to last, becoming a natural part of your home for years to come

BOX CONTENTS

1 x SEAT CUSHION

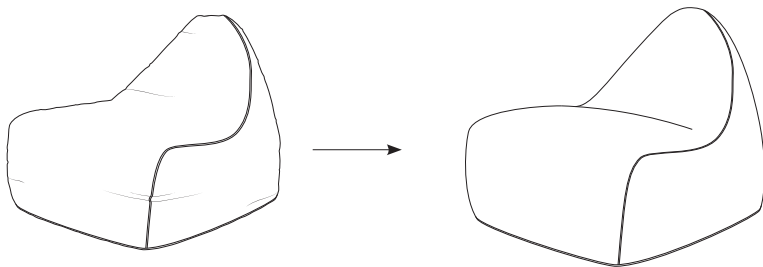

1 x BACKREST CUSHION

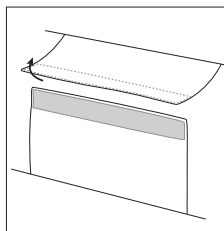

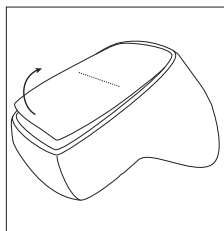

1 x COVER

When you receive your new SACKit Chair, the cushions will be vacuum-packed.

- **Shake the cushions thoroughly when removing them from the vacuum bags**
- **When all foam is loose, place the cushions into the cover and let it expand inside**
- **Two people is recommended for the assembly**
- **Optimal shape and comfort is reached after 72 hours**

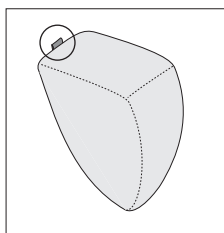

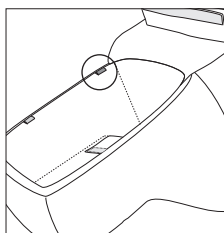

ASSEMBLY

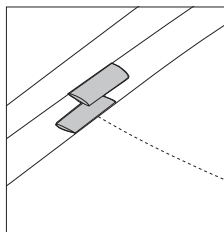

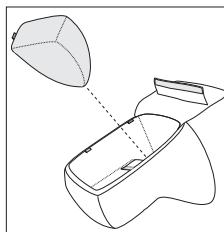

01

Unfold the cover and lay it on the ground upside down. Unzip the cover and open the velcro wall.

02

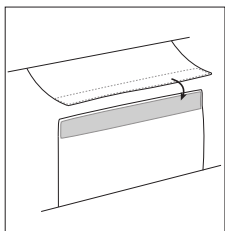

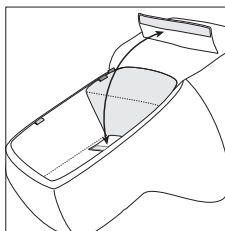

Find the colored labels in the cover and locate the corresponding cushions.

03

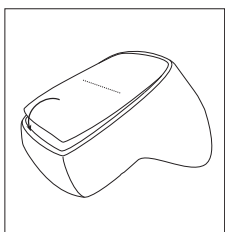

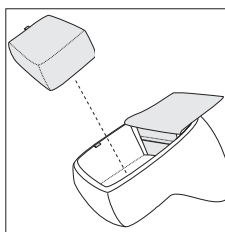

Insert the backrest cushion in the back of the cover. The cushion is positioned correctly when the two matching labels are aligned.

Ensure that the cushion is fully pushed into the top of the cover.

04

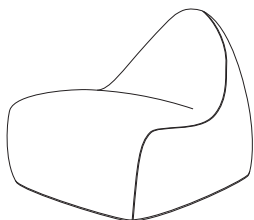

Close the velcro strip to secure the cushion.

05

Insert the seat cushion. The cushion is positioned correctly when the two matching labels are aligned. Then close the cover.

Note: Ensure that the seat cushion is installed in the correct orientation. Incorrect positioning may allow water to enter the chair.

06

The chair is now fully assembled and ready for use.

Please note

- The fabric may appear wrinkled at first but will smooth out
- Optimal comfort is reached after 72 hours
- After 7 days, the chair will be in its final shape

CARE AND MAINTENANCE

Taking care of your SACKit Chair Outdoor, will help extend its lifespan and preserve the quality of both the foam and fabric. The following guidelines provide general advice to help you maintain your lounge chair:

- Although your SACKit Chair is made from durable, weather-resistant materials we recommend protecting it during heavy rain and the winter months. Use the SACKit Cobana Lounge Chair Winter Cover, or, if possible, store the chair indoors or under a covered area during winter and heavy rain.

note: SACKit Chair Outdoor is water-repellent, but not waterproof. Therefore, water penetration may occur under extreme conditions.

- To preserve the look of the textile remove leaves and dirt regularly. For stains, use SACKit Textile Cleaner or a mild detergent with lukewarm water. Avoid strong chemicals or rubbing the fabric harshly, as this may damage the surface.
- Your SACKit Chair is filled with shredded cold foam. Over time, the filling may compress slightly. To maintain its shape and volume, fluff or knead the chair regularly.
- To ensure proper air circulation and prevent moisture build-up or rot on the ground surface—especially if the chair is placed on a wooden deck or other organic material—we recommend flipping the chair upside down from time to time. Allow both the bottom of the chair and the ground surface to dry completely before placing the chair back in position.
