

SACKit CHAIR

instruction manual

SACKit®

INTRODUCTION

SACKit Chair Indoor blends comfort, aesthetics, design, and function in one harmonious expression. It is designed to create space for calm and balance – those moments when everyday life slows down. A lounge chair for life at home - timeless, tactile, and unmistakably Scandinavian in both form and feel.

- Comfort that lasts – Filled with soft, supportive foam that adapts to your body and keeps its shape and comfort year after year
- Made for everyday living – Designed to blend naturally into any space and every moment – from the living room and reading nook to the playroom and bedroom
- Crafted with care – Thoughtfully designed and built to last, becoming a natural part of your home for years to come

CARE AND MAINTENANCE

Taking care of your SACKit Chair, can extend its lifespan and preserve the quality of its foam and fabric. The following guidelines provide general advice to help you maintain your lounge chair:

- *To prevent damage, avoid placing the SACKit Chair in direct sunlight or near heat sources. Even though the SACKit Chair is made with high-quality fabric, exposure to sunlight and heat can cause all textiles to fade and seams to weaken over time.*
- *Regular cleaning is essential to maintain the fabric's appearance. Dust and dirt can gradually wear down the material, so it's important to vacuum the lounge chair regularly using an upholstery nozzle. This will help remove dust and minimize fluff or pilling, keeping the fabric in good shape.*
- *The foam inside the SACKit Chair may compress slightly over time, why it is a good idea to fluff the filling regularly by gently kneading the modules.*
- *In the event of a spill, address stains as quickly as possible to avoid permanent damage. Most stains can be effectively removed by using lukewarm water and a clean, lint-free cloth. If necessary, use the SACKit Textile Cleaner or alternatively a small amount of neutral detergent, but be careful not to rub the fabric too harshly, as this can result in discoloration or damage. Refrain from using concentrated detergents, bleach, ammonia, or cleaning products designed for hard surfaces, as these can harm the fabric.*

BOX CONTENTS

1 x SEAT CUSHION

1 x BACKREST CUSHION

1 x COVER

When you receive your new SACKit Chair, it will be vacuum-packed. This makes it easier to handle and is also better for the environment. Once you remove the cushions from the packaging, they will begin to expand immediately. However, it takes up to 72 hours for each cushion to fully regain its shape and size. Place the cushions into its cover right after opening the packaging and allow them to expand inside. We recommend being two people for the assembly of the modules.

During the expansion period, gently fluffing and kneading the module can help the foam distribute more evenly inside the cover.

ASSEMBLY

1. Insert the seat and back cushions into their designated compartments within the cover. We recommend inserting the back cushion first. Each cover has a label along the bottom edge that matches the color of the label on the corresponding cushion.

The cushion is correctly positioned when the two labels are aligned and facing each other.

2. Before inserting the seat cushion, close the compartment for the backrest cushion by attaching the velcro strip on the inside of the cover to the strip on the bottom.
