WOOFIT

We think we may have hit gold with this little copper coloured speaker. The colour is bang on trend this season, and its size means we can literally slip it into a handbag, or even a large pocket, and lug it around everywhere we go.

What we like? For the size, the speaker's sound is incredibly loud. We carried it to the gym quite a few times, and were amazed with how effective both

the wire connection and bluetooth settings were. We didn't lose connection at any point, and were impressed overall with what this affordable speaker has to offer, and the amazing power it contains.

What we didn't like? The bass isn't as powerful as other speakers, though it isn't unsatisfactory either.

To buy: Dhs199 at Virgin Megastore.
